

Thinking Outside the Box

This is a great game to play in and around the home and garden. Parents and care givers can join in too.

All you need is a matchbox or a box/container of a similar size and your thinking caps on.

Now the aim of the game is to fill the box with as many small things as you possibly can, simple right?

It's amazing how many things there are in our homes and garden that will fit.

In just half an hour here are just a few things (18) I found
And I still had room for plenty more.

Happy hunting!!
